

SubC Blackbox is a versatile and user-friendly solution designed to record every moment of your inspection or survey in high-quality detail.

This powerful tool features:

- Continuous, uninterrupted, and reliable recording of up to 6 channels, including SD, HD, 4K, screen capture, IP cameras, or SubC Real-Time Streaming presentations
- Record all incoming sensor and telemetry data, providing comprehensive coverage and insight into operations
- Live-streams video and data
- Flexible output options including HDMI, SDI, or RTSP for video, and Serial, UDP, or TCP for data
- SD down conversion helps conserve HDD space and reduce hardware requirements
- Available as a software-only license, with optional hardware if required

Comprehensive Coverage

Capture up to 6 high-quality channels from various sources, including incoming sensor and telemetry data. Enables monitoring and management of crucial operational information, ensuring all relevant data is recorded and available for analysis.

Flexible Output

Flexibility to use different video and data outputs based on user preference and seamless compatibility with existing equipment.

Efficient, Reliable & Cost-Effective

Reliable, uninterrupted recording with ample storage, while also optimizing hardware usage and reducing costs for users. A cost-effective solution for users who already have the necessary hardware.

Customizable Licensing

Customizable licensing options based on user needs and budget, including convenient and easy software transfer to different machines.
